

Seesaw Frequently Asked Questions

I have multiple children. How do I log them all in?

If you only have one device, you will need to log out after each child has completed their work. You can then log in your next child. Alternatively, if you are on a computer, you could use different browsers for each child (eg. one child on Chrome, another on Firefox, etc.)

Will other children see my child's work?

No, your child's work is private and is only shared with your child's teacher/s. However, if a teacher posts a note to everyone, comments you make on that post will be seen by everyone.

How will I know if my child has activities to complete and how do I access them?

If your child has been assigned activities to complete, there will be a red notification bubble on the Activities Tab (see picture below). Click on this tab and it will take you to all of the activities that have been assigned for your child to complete.

How will I know if my child has a message from their teacher and how do I access them?

If your child has received a message from their teacher, there will be a red notification bubble on the Inbox Tab (see picture below). Click on this tab and it will take you to the messages.
